SUBJECT: Opening of Thailand subsidiary

December 2015

LUBE Corporation

Eijiro Horikoshi

Representative Director and President

Noriaki Nishi

CEO LUBE Asia Pacific

Dear customer,

Please allow us to begin by thanking you again for all of your continued support. We are proud to announce the opening our 6th overseas branch in Thailand, LUBE Asia Pacific, following the United States, China, India, Germany and Vietnam. LUBE Asia Pacific will be promoting LUBE lubrication systems and LUBE high performance lubricants to the diverse segments of the manufacturing community. Our goal is to enhance various supporting services, preparation of literature and instruction manuals (GHS, etc.), so the manufacturers can use our products with confidence.

[Purpose for opening Thailand subsidiary]

With increased development of the automotive, consumer electronics and IT industries in Thailand, our existing and prospective customers are rapidly growing within these markets. In the near future, the significance of Thailand will continue increasing with all Asian countries. Consequently, demand for quick product delivery, repair service, maintenance, inspection, product literature, manuals, and technical seminars will become extremely important. We have decided that this full-scale business expansion will gain the trust of the customers by meeting and exceeding their expectations. We are planning to introduce recyclable grease cartridges, food-grade grease lubrication systems, and NSF (National Sanitation Foundation) lubricant standards.
